

TB3 PREPPER

PORTABLE PIPE BEVELLER

Cutting Range	Minimum (ID)	Maximum (OD)
Metric	25mm	89mm
Imperial	1"	3-1/2"

The **TB3 Prepper** is a rugged, portable, machine designed for the removal of tube-to-tube sheet welds in heat exchangers and boilers.

This bevelling machine can also be used for facing and bevelling the ends of tube and pipe for general welding and fabrication processes.

Utilising a torque reacted locking system and durable taper roller bearings, this end preparation lathe is highly stable.

The machine is supplied with hand wheel feed as standard. A ratchet feed mechanism which is designed for weld removal applications where space may be limited, is available as an option.

Optional ratchet feed

**Available in
110V / 220V**

**Available in
