

TUBE PLUGGING

ONE PIECE TUBE PLUG

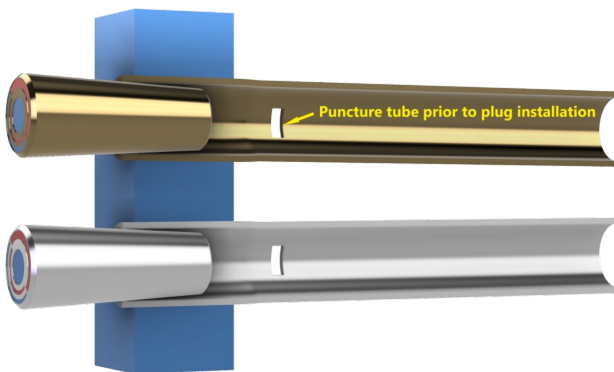

Metal tapered tube plugs

For permanently plugging leaks in heat exchangers, boilers & condensers.

Metal tapered tube plugs are a one-piece tapered design with a gramophone finish, effortlessly installed to secure a favourable seal with minimal effort in mere seconds.

NOTE: Always puncture the tube prior to installing any plug to ensure that pressure cannot accumulate and lead to the plugs loosening or being expelled from the tube.

Do not hesitate to inquire about our One Rev Cutters, designed for puncturing tubes.

Size chart

Part No.	Tube OD (In.)	Gauge	Dimension (mm)		
			"A" Small End	"B" Large End	"L" Length
