

TUBE CLEANING BRUSHES

Nylon Wire Brush

Brass Wire Brush

Steel Wire Brush

Stainless Wire Brush

Tube Cleaning Brushes consisting of bristles are ideal for grinding, deburring, cleaning, polishing and fine surface finishing of plastic and metal parts. Also known as an interior brush, bottle brush, pipe brush, pipe cleaning brush, tube brush and twisted wire brush. These brushes are supplied with an M6 external thread and can be extended to the required working length using twisted wire extension rods and handles available in individual 1 metre lengths.

The tube cleaning brushes can also be used to clean tube sheet holes prior to grooving or expanding.
